### SELFISHNESS PROMISES TO INJURE THE STATE.

There is no end to the scheming of our Salt Lake friends in connection with the establishing of a trans-continental automobile route. At the moment when congratulations were being extended to Ogden on having been placed on the Lincoln Highway. the very men who were offering he good cheer were planning on a cleve; move to have the trail go south of Great Salt Lake, a scheme which, it successful, would prevent Ogden from being the supply point for all tour ists going east from the coast

Here is an extract from the Silver State of Winnemucca, Nevada, which discloses part of the plans of the Sait Lakers:

the Salt Lake wholesale paper house of the Lambert Paper company, was in Winnemucca yesterday. When asked what was new in Salt Lake in regard to the route for the Lincoln highway, Mr. Lambert replied:

'Salt Lake favors what is known end of the lake. For this reason an idea has become current that we are against the 'Northern Route,' which would run through the Humboldt valley. This is not true We are only opposed to having the route run around the north end of the lake. Afpassing around the south end of ranch, County Well, Salt Springs, Fish accomplish Springs, Willow Creek, Deep Creek, But with

which is the Nevada line.
"From the state line there is a Shellbourne pass into Steptoe valley, ley, and north to Deeth.

Each of these three routes possesses many advantages over those farther south. At all of the points named, gasoline and auto supplies may be obtained at reasonable prices and after reaching the Nevada line telephone communication may be had with the outside world."

The people of Brigham City and all of Box Elder county should take note of this campaign to cut them off the transcontinental highway. They are equally concerned with Ogden in resisting this movement in Salt Lake to wipe all northern Utah off the automobile trail.

The Salt Lakers commit the unpardonable offense of laboring to force tourists west from Salt Lake over the most desolate part of this state, rather than have them go north through peach and apple orchards and beautiful fields of alfalfa and grain. and they are perpetrating this wrong from the extremely motive of desiring to be the first to catch the automobile parties coming from, or going

Sait Lakers should realize that the

only way by which to build up that

### COMPARES WITH THE PANAMA CANAL

The waters of the Atlantic and Paas the 'Southern Route,' which will cific are beginning to flow into the bring the road around the southern Panama canal and soon the Gatun dam will be part of a great inland iske and Culebra cut will be under water. Then much of the evidence We are only of the mighty work of excavating which has been carried on will be obilterated and the canal will be a the lake, the logical route would be less impressive lesson of what Amerto Grantville, Kanaka ranch. Orr's ican engineers and machinery can

But with the passing of the great army of workers on the canal and the choice of three routes, all of which withdrawing of the powerful maare better than the average road chinery, there still is to be seen quite as big an undertaking by Americans, action, there is bound to be progress. or by turning to the right the pass not at Panama, but in Utah, and it way of Currie, Elko county; the is none other than the task which third route goes from Deep Creek to the Utah Copper company has set has that population. may be avoided and tourists can come uself in the tearing down of a mountain of low grade porphyry copper ore in Bingham canyon, 75 miles southwest of Ogden.

An engineer who visited the copper company's plant has made this comparison

While not as large in respect to the volume of dirt handled daily as at Panama, the ultimate quantity excavated at the Utah Copper will be more than double, or probably two Panama, the ultimate quantity excatotal amount of earth moved at Culebra.

The maximum amount of material excavated at Culebra has been in the neighborhood of 2,500,000 cubic yards pc; month, while the average rate of excavation has been approximately 1,200,000 cubic yards per month, based on last year's operations. At Utah, the maximum quantity of material handled has been 30,000 cubic yards in a day, or at the rate of 900,000 cubic yards per month During one month there was handled 861,000 cubic yards, while for 1912 there was moved an average of 530,-600 cubic yards per month. It will be seen from this that at the Utah privy council Copper property about one-third as much material is handled as at the big Culebra cut.

The total excavation at Culebra, as carried on by the United States government, has amounted to 100,000,-060 cubic yards, while in the case of the Utah the total quantity of ore and overburden which will be removed in mining the 316,500,000 tons of copper ore which has already been proven to exist, will necessitate the handling of 200,000,000 cubic yards. and possibly, 250,000,000 cubic yards

While Culebra cut has a far greater length than that of the excavation of Utah: at Utah, being nine miles long, its average height is not more than 120 feet. At Utah Copper, the sight is a very impressive one, for the mountain side on which the steam shov- ning thence north 79 degrees, east 37 els operate, rises to a height of 1500 feet, thence south 134.47 feet, thence feet above the canyon.

Threshed Out at International Congress on Alcoholism at Milan.

Milan, Italy, Sept. 23.—The econ-omic importance of the liquor traffic which is vital to wine growing countries such as Italy, France and Spain or spirit drinking countries such as Scandinaira, Germany and the United Kingdom, was discussed at the re-sumption today of the sessions of the International Congress on Alcohol-

Deputy Ottavix of Italy, dealt with the problem from the wine growers point of view. Dr. Hartwig, a Gercan delegate, argued from the standpoint of the beer producers and Dr. Seppala of Finland from that of the spirit distillers. All agreed that proper legislation could be passed for the suppression of alcoholism without endangering the condition of the various peoples concerned.

After the discussion, the members

met and drew up the basis for the foundation of three great international institutions, a bureau for com-betting alcoholism, a federation for the protection of native races and a federation of temperance physicians.

# MINERS OBEY STRIKE CALL

Trinidad United Mine Workers Demand Recognition of Their Union.

Trinidad. Colo., Sept. 23 .- This morning at 8 o'clock several thou-sand miners in the southern coal fields of district 15, Colorado, United Mine Workers of America, entered upon a strike which has for its chief purpose the recognition of the union. The labor leaders unhesitatingly declared a great majority of the men working the coal mines would ohey the strike call, issued a week ago, while operators are as unaninous in their statement that not mough workers will leave their employment to seriously cripple the mine operations.

At the beginning of the strike the operators take a positive stand that there will be no compromise with the miners on the demand of union rec-ognition. The other demands of the miners-for their own check weighmen, privileges to live where they please, trade where they please and employ such physicians as they please—are not receiving much discussion either from operators or for miners. Opposed to the operators position are the union leaders who declare the strike will be continued until recognition is secured.

Reports from various mlning camps in the district tend to show that the walkout will be general. In spite of the strike votes taken at the various mines last night op-erators declare that their mines will open today as usual and that work

will progress. No violence of any sort has occurred, except in Colorado Springs, where a negro miner was said to have been attacked by miners last night Conditions in mining camps give little evidence c ment which may be attendant upon the strike which state officials in Denver fear may assume proportions ever will be conducted by the govas large and as serious as any which ever occurred in Colorado.

## ALBANIANS' FIERCE FIGHT WITH SERVIANS GOVERNOR WILL

Vienna, Sept. 23 .- In a fierce bat le today between Servian troops and ibanians on the new Albanian frontier. 200 Albanians were killed and a arge number wounded. The encounter was brought about

an attempt of several thousand Albanians to penetrate the territory captured by the Servians from the They were repulsed. The Servians lost one captain and a con-siderable number of men.

### RAISING QUARANTINE HELPS WEBER FARMS

newspapers to ask whether he should not be prosecuted for sedition or ba deprived of his membership of the privy council.

Strip of land which connected the two leaders planned to make the gathering one of wider importance than this duty signified.

It became known today that Republication of the world may be more closely united.

It became known today that Republication of the late last night had made little progress. R. N. Rasmussen, horticultural inlicans opposed to the leadership of telephoned to J. Edward Taylor, state horticultural inspector, yesterday that tomatoes, which had been 25 cents a crate, with scarcely any demand, had as gone to 30 cents with an active demand, and that two carloads had been sent to the Montana market from Ogden, in addition to several tons that went by local express.

Squashes, which were seiling in Weber county for from \$6 to \$8 a ton, with siew demand, have gone to \$10 nuggets was found by workmen here a ton and the demand is active, according to Mr. Rasmussen, who says ing. that the raising of the quarantine is directly responsible for the changes, earliest days of Summit county.

# LAND DRAWING MONTANA

Glasgow. Mont., Sept. 23.—Drawing for approximately 7000 claims comprised in the 1,345,000 acres in the Or whether they will soon unravel. Fort Peck Indian reservation in northeastern Montana, which has just been thrown open to settlement by the government, were begun here at noon to-

ay.
At that hour Zita Friedl, the eight year-old daughter of Mayor Friedl of
